FX24 Copy Client Installation Manual

Automated MT4 / MT5 copy trading — connect your account to the FXShop24 master account in minutes

MT4 · [FX24CopyClient.mq4](#)

MT5 · [FX24CopyClient.mq5](#)

Version 1.0 — October 2026 · Telegram support: [@fxdaemon](#) · Channel: [@fxshop24](#)

Requirement: active PRO subscription (fxshop24.net/membership)

1 Requirements

- MetaTrader 4 or MetaTrader 5 on Windows (any broker, any account size — demo accounts work too)
- An active PRO subscription (page: fxshop24.net/membership)
- Your FXShop24 account email and password (the ones you use to log in on this website)
- Internet connection — a VPS near your broker is recommended but not required

2 How it works

Our master EA trades on our account! your Copy Client EA reads the signal copied to your MT4/MT5 with lot sizes automatically scaled to your balance. All you need is MT4/MT5, your FXShop24 credentials and an active PRO subscription.

3 Download the Copy Client EA

Download the source file for your platform (PRO members only), then compile it in MetaEditor with F7 — it takes 10 seconds and you can inspect the code before running it:

- MT4: FX24CopyClient.mq4
- MT5: FX24CopyClient.mq5

Full guide with download buttons: fxshop24.net/fx24-copy-trading-setup-guide/

4 Installing in MT4 / MT5

- 1 Open MT4/MT5 and go to File! Open Data Folder
- 2 Open the MQL4! Experts folder (MT4) or MQL5! Experts (MT5) and paste FX24CopyClient.mq5 there
- 3 Open the file in MetaEditor (right-click it in the Navigator! Modify) and FX24CopyClient.ex4 (MT4) or FX24CopyClient.ex5 (MT5)
- 4 Restart MT4/MT5 (or right-click Expert Advisors in the Navigator and press Refresh)
- 5 Drag FX24CopyClient from the Navigator onto any chart (any symbol works — we suggest the chart of your main traded symbol, e.g. XAUUSD)
- 6 In the Common tab enable Allow live trading, then press OK

5 Configuration & log in

Open the Inputs tab of the EA and set:

Setting	Value
InpSiteUrl	https://fxshop24.net
InpEmail	your FXShop24 account email
InpPassword	your FXShop24 account password
InpLotsPer1000	risk size, e.g. 0.03 = 0.03 lot per \$1,000 of balance (lower it to reduce risk)
InpSymbolMap	only if your broker renames symbols, e.g. XAUUSD=GOLD — otherwise leave empty

InpEverySec

30 (sync interval in seconds — keep default)

Press OK. Make sure AutoTrading (MT4) or Algo Trading (MT5) in the toolbar is green.

In the Experts tab you should see: "FX24 client OK — balance synced". The EA now copies every trade automatically.

6 How lot sizes are copied

Position sizes are copied in proportion to your balance — the ratio between consecutive trades is always preserved:

Master account (\$2,400)	Your account (\$1,200)	Your account (\$500)
0.07 lots	0.03 lots	0.01 lots
0.10 lots	0.05 lots	0.02 lots
0.20 lots	0.10 lots	0.04 lots

You can scale everything up or down at any time by changing InpLotsPer1000.

7 Symbol names & brokers

- If your broker calls gold GOLD instead of XAUUSD, set InpSymbolMap = XAUUSD=GOLD
- Broker prefixes/suffixes (e.g. XAUUSD.pro) are handled automatically — just make sure the symbol is visible in your Market Watch

8 Troubleshooting

Message in the Experts tab	Fix
ERROR AUTH	Wrong email/password — use your FXShop24 website login
ERROR NO_SUB	No active PRO subscription — check My Account !' Subscriptions
WebRequest error 4060	Tools !' Options !' Expert Advisors !' allow WebRequest for https://fxshop24.net
Trades not copied	Check AutoTrading (MT4) / Algo Trading (MT5) is green and the smiley is on the chart
Nothing happens at all	Contact support on Telegram @fxdaemon

RISK WARNING:

Trading foreign exchange and CFDs carries a high level of risk and may not be suitable for all investors. Past performance of the master account is not indicative of future results. Never trade with money you cannot afford to lose.
